proyecto lazarus

PROYECTO LAZARUS is a spanish conceptual and experimental project initiated in 2012 by Lázaro Gutiérrez. Under the slogan "behind the silence", and with the belief that every sound is more important than a thousand mute images, he tries to translate thoughts and feelings with influences New Age and Ambient in all their shapes [Dark Ambient][Space Ambient][Dronescape][Noise Ambient], through his music, showing specific landscapes or unknown landscapes from simple strokes in the air.

DESCRIPTION:

LEMNISCATA, is the eighth work conceived and produced by PROYECTO LAZARUS, and the first one created in 2015. It's a double album with two parts [Phase 1 & Phase 2] and different concepts, but obviously under a common idea. You can hear them as separate tracks, or as single sessions of 32 minutes each one. All this, under chilean label M.I.S.T. Records.

lemniscata - phase 1 :

CONCEPT AND PHILOSOPHY:

Approaching to the idea of "infinity", from a scientific or material thought. In any art or experience, there is security and a mathematical control, and so, tending to infinity, is only an increase of numerical values, represented by the Unicode symbol ∞ , or "Curve Lemniscata".

Only the doubt, only the fire of internal question, allows us to move beyond the rational ban, fueling our curiosity and admiration before perfection. As the child asking about everything, like a scientist, but still dreaming.

lemniscata - phase 2 :

CONCEPT AND PHILOSOPHY:

When we approach the unknown and try to understand it, our conclusions are limited by our experience. Being fear is logical and humane, because it's a one way trip, hardly graspable by a finite mind and a life with expiration date (...) but we can overcome any physical barrier, delving into the essence of infinity.

Therefore, beyond mundane recommendations and biological walls, there is a "frightened man" who continues asking himself questions, and still wants to understand beyond mathematics.
